

TrackIT

Purpose-Built Solution

Avoid the hidden costs and complications of BYOD (Bring Your Own Device) with our all-inclusive, Andoid solution that is extremely consistent and easily supported. Our RDT/OBC solution offers complete TrackIT functionality on ELD compliant hardware.

Rugged Data Terminal (RDT)

- Wider Temperature Ranges
- Powered Dock
- Mobile or Affixed
- Ruggedized Silicone Case
- Can be used outside of Truck
- Android Power!
- FiveCubits Managed MDM
- Single Data Plan

On Board Computer (OBC)

Mounted under the vehicle dash, the OBC is always tracking your fleet.

Use the OBC stand alone for:

- Constant GPS and Cell
- Engine Diagnostics
- Fault Code Reporting
- Driving Behavior
- Customer Designed Event Triggers

Use the OBC in combination with our purpose-built RDT Android solution or a BYOD Android solution to enhance the OBC features with full TrackIt functionality including:

- Driver Behavioral Feedback
- Fuel Tracking
- Driver Vehicle Inspection Reports (DVIRs)
- ELD/Driver Logs
- Voice
- Statusing & Messaging
- MOBILEticket, Map Order Entry and other key integrations
