Command Alkon releases Plant Watcher version 1.1.0.0 to its customers

Birmingham, AL – May 15, 2009: Command Alkon, a global leader in integrated solutions for the construction materials industry, is pleased to announce the release of its newest version for the Plant Watcher notification system. Plant Watcher sends immediate e-mail or cell phone text messages for “out-of-tolerance” concrete batches, authorized and non-authorized mix design changes, and plant status alerts to users setup on the system. This allows for interception of out-of-specification loads from reaching the job site or immediate notification of a plant down situation. The system can create profiles for each batch plant to be monitored and can provide different types of notifications to different users. It can also automatically escalate issues to senior management when required. New features for version 1.1.0.0 include: a new Plant Watcher Wizard that guides users through the setup process for sites, recipients, and profiles; a new XML Export option which can be sent to your computer’s Desktop or e-mailed to a recipient; and an Enhanced Plant Performance Report that provides powerful analysis of your COMMANDbatch enabled plant.

Command Alkon Incorporated develops, markets, and supports software and hardware products for the construction materials industry including ready-mixed concrete, aggregate, and asphalt producers.

Command Alkon is a Birmingham, Alabama based company with offices in Columbus, Ohio, Kansas City, Kansas, the UK, France, the Netherlands, Colombia, India and Australia. Command Alkon has been a long-term, financially stable provider to the construction materials industry for over 30 years.

Command Alkon offers 24-hour customer service seven days a week. You may reach a Command Alkon representative through its web site at www.commandalkon.com, or call toll free from the U.S. or Canada at +1-800-624-1872. If outside of the U.S. or Canada, please call +1-205-879-3282.
