## COMMANDaggregate

### Map Order Entry (CA-MO)

---

**Description** COMMANDaggregate's Map Order Entry (CA-MO) module provides street addresses with corresponding geographical data to be accessed during order entry and stored with order records.

---

- Features**
- Allows a street address to be found in the process of order entry.
  - Displays a pop-up map and pin points the location.
  - Reports the longitude and latitude of the location which automatically identifies the map page thus improving the accuracy of scheduling.
  - Allows the dispatcher to advise the driver the best route to a job before leaving the plant.
  - Pulls the correct address from the map into Order Entry.
  - Stores geographic data with the order record.
- 

- Prerequisite Module**
- **Order Entry and Ticketing (CA-OE)**
  - **Customer to supply mapping software. Command Data mapping interfaces currently support Microsoft MapPoint 2000 and MapObjects.**
-
