COMMANDaggregate

Pricing and Prep (CA-PP)

Description COMMANDaggregate's Pricing and Prep (CA-PP) module is used for correction of pricing and taxing, as necessary. This module interfaces corrected information to the Invoicing (CA-IV) module or to a third party accounts receivable system for invoicing.

- Features**
- Prices products sold according to various pricing formulas. These formulas include quotes by project, customer, discount, etc. Prices for minimum loads and other special charges can be determined.
 - Computes taxing according to user defined tax formulas.
 - Creates a priced order register which prints price, tax, and extended orders for validation prior to editing the data.
 - Allows editing of all past orders and tickets.
 - Provides password protection.
 - Passes edited or unedited data to an accounting system for invoicing. The data can be tailored, as required.
-
