

COMMANDconcrete Credit (CC-CR)

Description COMMANDconcrete's Credit (CC-CR) module automatically checks the credit limit of a customer upon the creation and/or edit of each order. When the credit limit is exceeded by an order, a warning window with detailed credit information is displayed. The credit limit is checked again for the first ticket of the day on any given order.

Features

- Provides a warning window when credit limit is exceeded.
- Displays the amount of the credit limit, current A/R balance, shipped orders not invoiced, booked orders not shipped, current order, and total amount.
- Allows the order to be accepted with an override code or allows for order suspension.
- Allows for the creation of a password authorization code for orders which exceed the credit limit.

Prerequisites

- Order Entry and Ticketing (CC-OE)
- Accounts Receivable (CC-AR)
- Invoicing (CC-IG)

Notes - none
