

## COMMANDcartage (CC-CT)

---

**Description**      COMMANDconcrete's Cartage (CC-CT) module allows you to compute pay for hired truckers. This module works with information from the Order Entry and Ticketing module.

---

**Features**

- Allows for the creation of cartage rate codes, cartage surcharge codes, quoted cartage rates, deduction codes, quoted deductions, and cartage accounting periods.
- Supports various cartage calculation methods including hourly (productive), load, quantity/distance, plant/zone, quantity, and custom (user defined) tables.
- Supports inclusion of surcharges to be paid to haulers in addition to the base cartage.
- Allows for the creation of tables to handle different quoted hauler pay rates specific to certain customers, projects, haulers, trucks, and/or drivers or any combination thereof.
- Computes amount due to haulers for each ticket shipped. (Does not provide the ability to charge concrete customers for hauling.)
- Facilitates ticket updates and allows ticket edits.
- Allows generation of hand-keyed cartage tickets.
- Facilitates deduction updates and allows deduction edits.
- Creates hauler revenue reports detailing the total revenue earned in detail or in summary format, grouped by hauler, truck, or driver, and for a single day or a range of days.
- Creates deduction reports grouped by hauler, truck, or driver, for a single pay period or a range of periods.
- Creates hauler settlement sheets showing the total revenue earned in detail or in summary and grouped by hauler, truck, or driver, combined with the deduction report data giving the total amount to be paid to the haulers, trucks, or drivers.

---

**Prerequisites**    - Order Entry and Ticketing (CC-OE)

---

**Notes**            - None
