

## COMMANDlien(CC-LN)

---

**Description**      **COMMANDlien** is a powerful, integrated management tool that collects lien information, produces lien documents, and monitors lien statuses using a seamless model that tracks the lien process from Project Quotation through Project Completion. The key to effective lien management includes efficient data collection, exception-based notice management, and release management with tight-but-flexible integration between the sales and collection process.

---

### Features

- Efficient Data Collection Methodology. To ensure efficient data collection and selection, the system supports Drill Into Technology which lets users add, edit, or view detailed lien information "on the fly" if the user has sufficient privileges.
  - Create lien locations at Order Entry with no loss of data.
  - Exception-based Lien Location Management
  - Unlimited User-Defined Exception Rules (Queries)
    - o Ease the lien location management process.
    - o Design queries to capture data sets for online list management.
  - Flexible, configurable Lien Event Generation Tool.
    - o User-Defined Notices and Notice Document Format Control.
    - o User-Defined Releases and Release Document Format Control.
    - o User-Defined General Events.
  - Complete Event History Log.
  - Customer and Project control of required lien management options.
  - There are no state specific constraints because the state independent rules are user configurable.
  - California and Florida tested. California and Florida have some of the most rigorous lien rules in the US. We chose these states from which to model our configurable system.
  - Status-Based Exception Modeling. Track lien information from Creation Status to Completion Status and beyond with New Activity detection.
  - Seamless Integration with COMMANDseries Modules:
    - o COMMANDconcrete Order Entry and Ticketing
    - o COMMANDaggregate Order Entry and Ticketing
    - o COMMANDinvoicing Invoice Preparation and Management
    - o COMMANDreceivables Transaction Management and Credit Analysis
  - View outstanding AR items while generating conditional and unconditional progress releases.
  - Wide variety of standard lien reports, plus query reports.
