

SECOND WATER METER INPUT

Part Number: 23818

DESCRIPTION:

This option provides an additional water meter input. (If an additional water feed is required, see Water Feed Controlled – P/N 23819.)

OPERATION:

Automatic

- During automatic batching, metering starts when the mix design calls for the material. The batching system translates meter pulses into gallons (or appropriate units) and displays this amount on the Manual Station's meter display. Metering stops when the water target weight is reached (and is within tolerance).

Manual

- The operator pushes the desired WAT FEED pushbutton on the Manual Station. Metering continues as long as the feed button is depressed. The batching system translates meter pulses into gallons (or appropriate units) and displays this amount on the Manual Station's meter display. Metering stops when the feed button is released.

SYSTEM REQUIREMENTS:

- An unassigned I/O position that is controlled by the Manual Station.

IMPLEMENTATION:

- Configure a display on the Manual Station.
