

VEHICOM TRUCK CALLBOARD

Part Number: Varies by number of lines and characters

DESCRIPTION:

The Vehicom Truck Callboard is designed to expedite traffic flow around the batch plant.

The Callboards consist of different sized digits and signs customized for each location. Loading information is automatically sent from the batching system and displayed instantly on signs throughout the yard to alert drivers. The original ultra-bright style Truck Callboards consist of 7-segment numeric displays for maximum view ability.

OPERATION:

Using information sent from COMMANDseries or entered directly into the batching system by the operator, the Vehicom Truck Callboard automatically displays individual truck numbers. Information is transmitted to the callboard via an RS-232 signal from the batching system.

SYSTEM REQUIREMENTS:

- A supported version of the batch control software.

IMPLEMENTATION:

Installation

- Mount the enclosure and supply AC voltage.
- Connect the supplied RS-232 cable from the batching system to the Callboard.
