

## **COMMANDqc Third Party Integration Module (CMDQC-3rdIM)**

---

### **Description**

Provides real time interfaces to plants, customers, projects, employees, labs, suppliers, delivery tickets, batch weights, raw materials and external testers that are in COMMANDseries, SAP, or other 3rd third-party management systems.

---

### **Features**

- Eliminates the need for duplicate data entry
  - Keeps customer, project and mix information in COMMANDqc in sync with your dispatch and batching system
  - Provides the ability to show product costs using the cost for the material at each plant
  - Saves valuable personnel time and allows QC staff to focus on other important tasks
  - Ensures delivery ticket information is available when test samples are entered, saves time and reduces data entry errors
  - Consistent data enables better quality control for your products
- 

### **Prerequisites**

- COMMANDqc Base Module
- 

### **Notes**

- NoneCustom software development may be required on the third-party system to make use of this module.
  - Full integration to recent versions of COMMANDseries is supported without custom development. Contact your Command Alkon sales representative to determine compatibility.
