

COMMANDqc Concrete Base Product (CMDQC-CBP)

Description

The Concrete Base Product provides the COMMANDqc menu, system setup functions, and universal features that all of the other COMMANDqc software modules require. Select other modules to build a system with the functionality that you require.

Features

- Single operating region or multiple regions to provide isolation for data such as mixes and material tests
 - Security groups to control access to regions, program functions and reports
 - "Out of the box" reports
 - Report Designer tool provides an administrator the ability to create or customize presentation-quality reports
 - Grid (spreadsheet style) reporting and graphing. Includes extensive tools for sorting, grouping, and filtering of data plus easy export to Microsoft Excel.
 - Individual user settings and hot key menu selection
 - Support for multiple languages as well as customized translation of screen labels and messages
-

Prerequisites
