

COMMANDqc Mix Submittal (CMDQC-MIXS)

Description

The Mix Submittal module supports the generation of technical documentation required by many projects and agencies. The user simply selects the project, required mixes, and supporting details; then the system automatically generates a consolidated, delivery-ready document in "pdf" format. This module can also be used to generate periodic progress reports of concrete performance during the course of a project.

Features

- Customize mix submittal report formats with your company's logo and company-specific disclaimers etc.
 - Alternate formats can be created for large contractors with special demands
 - Advanced filtering when retrieving submittals or mixes.
 - Calculated fields include yield, mix cost, unit weight, w/c ratio, etc.
 - Options for combined grading reports include % Passing, % Retained, .45 Power Curve, and Workability-Coarseness Chart
 - Option to include w/c vs. strength curve and backup data
 - *Option to automatically create and attach an up-to-date ACI Statistics Report
 - Material documents (e.g. supplier material certificates, MSDS sheets, etc.) are automatically retrieved and attached based on constituents in the Mix Designs
 - Attach any number of other internal COMMANDqc documents or external documents
 - Preview and arrange documents in the desired order
 - Supports full archiving, version control and approval status of submittals
 - Print and fax or email completed Mix Submittal
-

Prerequisites

- COMMANDqc Base Module (CMDQC-CBP)
 - *COMMANDqc ACI Statistical Report (CMDQC-ACISR)
