

## **CP-CR (COMMANDperformance Consumer Reporting)**

---

### **Description**

COMMANDperformance is a Business Intelligence (BI) application that extracts data from your COMMANDseries database, as well as other applications across your enterprise, to provide Reporting, Analysis, Dashboards, Scorecarding, Business Activity Monitoring, Planning & Forecasting. COMMANDperformance is powered by IBM Cognos Software Solutions. This particular package is targeted at producers with an existing COMMANDexecutive implementation, wanting to make a like-to-like conversion from COMMANDexecutive to COMMANDperformance.

---

### **Features**

- Includes standard reports and dashboards that present key performance indicators in an intuitive and easily understood format
  - Includes transactional and exception-based reports to meet daily reporting requirements and supplement business processes
  - Web portal serves as single access point to all data
  - Automatic scheduling and distribution of information via e-mail
  - Format reports in HTML, PDF, Excel, CSV and XML formats
  - Reports can be accessed in Microsoft Word, Excel and PowerPoint to further analyze your data
- 

### **Third Party Software Licenses**

The CP-CR package includes the following licenses for IBM Cognos Software:

- 1 BI Web Administrator Named User License that allows one user access to server, security, and report scheduling administration functions
- 1 Data Manager Run-Time that extracts data from multiple data sources and loads data into a pre-defined data mart
- Unlimited consumer licenses that allow any number of users to run reports and view dashboards

Note that additional licenses may be purchased separately, as needed.

---

### **Add-On Modules**

You may purchase additional IBM/Cognos products ala-carte, to work in conjunction with this package and expand your business intelligence capabilities. Please refer to CP-ADD for a listing of these add-on modules.

---

### **Server**

- Minimum System Requirements for the COMMANDperformance server are:
    - o Windows 2003 Standard Server
    - o 2.00 GHz or greater Processor speed
    - o 2.0 GB RAM per CPU
    - o 3.5 GB Disk Space
    - o Web Server - IIS
  - COMMANDperformance may be installed on a server with other applications. However, the product should not be installed on a server used as a transactional database.
- 

### **Prerequisites**

- Existing deployment of COMMANDexecutive
  - Oracle 10g or SQL Server 2005
  - The following CS modules are not required, but are beneficial for creating and editing transactional data:
    - o COMMANDquote for market analysis
-

- COMMANDfleet (or equivalent signaling) to assist in capturing fleet status times
- 2-Way Batch Interface to capture actual batch results from plant controls
- COMMANDinvoicing
- COMMANDreceivables
- COMMANDcredit

---

**Notes**

- Implementation includes installation of software and standard reports and training users to access reports and administer software.
- Training on report authoring or other studio functions is not included in standard implementation services.
- Additional labor may be required to integrate data sources other than COMMANDseries and/or develop additional reports
- Installation and customization work can be performed remotely to minimize travel and living expenses. If on-site work is required, travel and living will be billed separately.
